

API RP 1175 Pipeline Leak Detection Management of Change

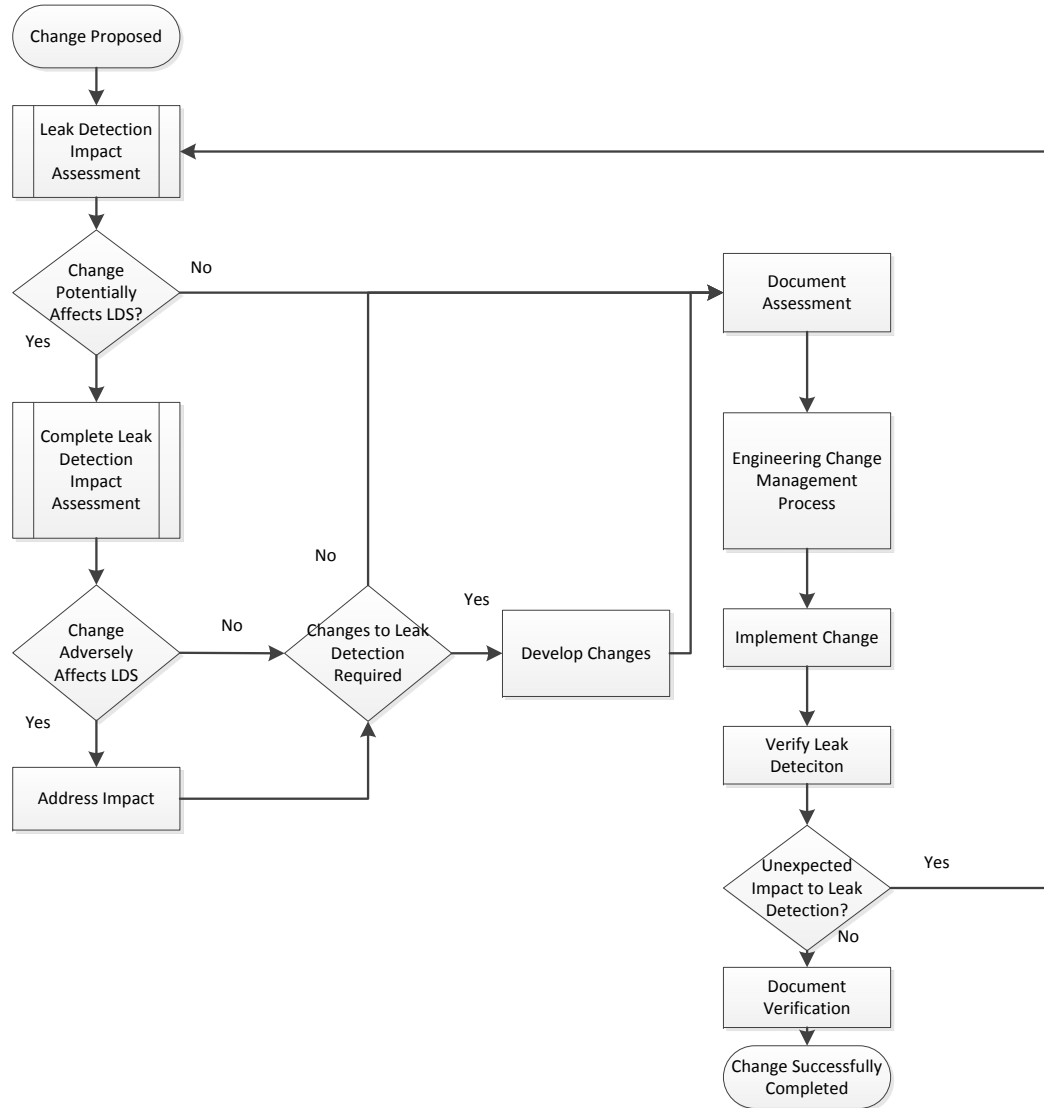

Know what's below.
Call before you dig.

Management of Change

- **The process should include:**
 - **Scope of the change(s)**
 - **Clearly defined roles and approval responsibilities**
 - Include stakeholders in planning
 - **Requirements for evaluating changes (e.g. Risk Assessment)**
 - **Testing and test methods (as needed)**
 - **Documentation plan**
 - **Notification requirements (Including Controllers and shift workers)**
 - **Training**
- **Special situations**
 - **Emergencies**
 - **Short term changes**

Management of Change

The MOC process should include the requirements of API RP 1167, Section 14 and API RP 1160, Section 13
